Post-World War I Migration & Displacement

Refugees at Gare de Lyon in Paris, France, early in World War I. The conflict is believed to have displaced as many as 7.5 million people. *Everett Collection via Wall Street Journal*.

Asia:

Migration peaked in the 1920s — 1.25 million migrants to Southeast Asia in 1927 and 1.5 million to North Asia in 1929.

Transatlantic:

Transatlantic migration was affected most by WWI, but recovered to 1.2 million migrants in 1924.

The Great Depression also curtailed migration, except the command economies of Japan and the Soviet Union, which produced up to 1.8 million migrants per year into North Asia by the late 1930s.

2. Displacement 1940-1960

Post-World War II 1940-1960

FORCED MIGRATION

Internally Displaced Persons due to Conflict and Violence

Refugees + Asylum-Seekers

*Source: IOM visualization based on UNHCR Mid-Year Trends 2015. Figures of asylum-seekers based on persons whose asylum claim was pending as of June 2015, regardless of the stage of the procedure. Internally displaced persons (IDP) refers to individuals assisted by UNHCR, including people in IDP-like situations (with similar protection risks but not reported as IDPs). Stocks recorded by June 2015 or latest available estimates. The map does not include *newly displaced by disasters* during the same period as this is a flow-type of data, therefore not directly comparable with stocks of refugees, asylum-seekers (pending cases) and conflict induced IDPs as of June 2015.

Sudden Disasters & Displacement

Conclusion

Conclusion

- Europe — transitioned from a *sending* region (19th & 20th cent.) to a *destination* region (second half of 20th & 21st cent.), due to development
- *Disasters* are becoming an increasingly significant reason of *displacement*
- Data on *migrant journeys* shows how deadly many routes have become
